The Information Disclosure Statement filed August 26, 2004 has been entered and made of record as paper no. 0804.

Original claim 10 depends from original claim 11. Correction is requested.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kagawa (US-5,371,405, cited by Applicant).

Kagawa discloses a power module comprising at least one power device (6), a housing element (13), a lead frame (3) including a conductive pad having large area to receive the power device, a heat sink (1), and a thermally conductive but electrically insulating material (2) interposed between and indirect contact with a second open surface of the conductive pad and heat sink. Note figure 1(b) of Kagawa.

In re claim 2, the house element 13 includes a molded rim surrounding the conductive pad.

In re claim 3, figure 2 show a plurality of conductive pads.

In re claim 4, the semiconductor devices are connected together as shown in figures 2-5.

In re claim 5, Kagawa shows power bus and common conductive pads in figures 2-5. Note elements 2-4, 9, and 11

In re claim 6, the conductive pads in Kagawa are isolated from each other as shown in figure 1(b).

In re claim 8, figure 1(b) clearly show the wire bond.

In re claims 11 and 12, the circuit board is formed inside of the housing as shown in figure 1(a).

In re claim 13, the conductive bars (10 and 12) are formed on opposite side of the housing element.

Claims 14-20 stand allowed.
